PRINCIPAL PRODUCT MANAGER

Commerce Platforms · Pricing & Inventory · Payments · Partner Integrations

Product leader translating commercial goals into funded platform strategies and simpler business operations. Experience setting product direction, securing investment, replacing legacy systems, and enabling business teams to operate independently. Combines technical product judgment with cross-functional leadership and coaching of PMs and analysts.

EXPERIENCE

Space Needle & Chihuly Garden and Glass

Principal Technical Product Manager | June 2024-Present

Own strategy and roadmap for a commerce platform supporting a business that recorded **2.4 million tickets and $83.9 million in sales, excluding tax, in 2025**. Lead product delivery with a **14-person cross-functional team** and approximately **$1.8 million in combined capital and operating funding across 2025-2026**.

- **Defined the roadmap around pricing flexibility and revenue opportunities**, sequencing product catalog, inventory, discounts, bundles, and sales-channel capabilities ahead of spring 2026 rules-based dynamic pricing. Secured **$200K in additional 2025 capital**, roughly doubling the year's capital allocation, to fund prerequisite capabilities.
- Replaced development-dependent product launches and specialized administration with permission-based self-service. Reduced routine product launches from **3-4 weeks to immediate publishing** and price changes from **two weeks to real time**. Removed the need for a dedicated ticketing administrator, enabling that position to shift toward product and IT work.
- Led the **January 2026 cutover across both attractions' web, kiosk, and box office channels**, retiring legacy ticketing software. Prepared departments through weekly demos, user training, documentation, and executive readiness checks; scheduled deployment around in-person selling hours.
- Delivered upsell and promotion capabilities supporting **$106K in recorded sales in 2026 YTD**. Adapted roadmap priorities toward flexible discounts, coupons, and product configuration as market demand softened.
- Led direct booking integrations with **CityPASS and GetYourGuide**, replacing manual voucher exchanges and monthly spreadsheet reconciliation with integrated workflows. Introduced partner inventory allocations and time-slot controls.
- Evaluated legacy retrofit, Ventrata, and an internal platform against cost, product fit, and roadmap control; selected an internal build. Chose **JoinIt** to meet a one-month season-pass deadline while preserving engineering capacity for dynamic-pricing prerequisites.
- Led the Chase-to-US Bank integration and contactless-payment rollout across approximately **16 kiosks and six box office selling windows**. Defined refund and credit rules spanning bank constraints, historical purchase prices, and valid bundle configurations.
- Used ticket-delivery usage and recurring printer-maintenance demands to retire kiosk printing. Established digital delivery with paper-ticket exceptions handled at box office, carrying that approach into replacement kiosks.
- Review feature work and coach **three team members, including two business analysts**, on prioritization, requirements, and stakeholder communication. Mentor a peer PM on roadmap development, delivery expectations, and communicating changes to stakeholders.

EXPERIENCE, CONTINUED

JSR Life Sciences
Senior Product Manager - Consultant | February 2023-January 2024

- Advised teams on data quality, organization, visualization, and tool selection. Coached stakeholders to design reporting around business questions, presenting information that directly supported decisions.

Committee for Children
Senior Product Owner | January 2020-February 2023

- Led stakeholder reviews and negotiated MVP scope and release sequencing supporting the launch of **Second Step SEL for Adults** and development across K-8 offerings.
- Introduced daily bug review and prioritization, regular bug-fix releases, and clearer agreement on what would ship. Coordinated larger product releases **two to three times annually** around the school calendar.

Zipwhip
Program Manager / Technical Project Manager / Scrum Master | October 2018-December 2019

- Led self-service signup and automated line provisioning, enabling immediate activation without staff intervention and increasing monthly sales by **$15K+**.
- Coordinated delivery planning, dependencies, and blocker resolution across **50+ engineering contributors** in domestic and overseas teams.

Security Industry Specialists
Product & Project Manager | January 2012-October 2018

- Owned requirements, prioritization, development coordination, and rollout for a **Salesforce-based timekeeping and clock-in/out system**, working with a five-developer team.

CORE EXPERTISE

Product strategy and roadmaps · Investment cases · Build-versus-buy evaluation · Pricing and inventory · Payments and refunds · API integrations · Platform migration · Operational automation · Product coaching
